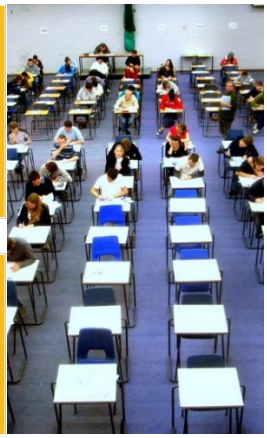
WEX / Careers at Kingswood

The Outreach team at the University of Bristol delivered an engaging and interactive session for our year 10 students on engineering skills and paths into employment. These sessions provide an incite into different job roles and the qualifications that are needed to work in these employment fields.

Here at Kingswood we had a very successful start to our exam season!

We had all current year 11 students attending school sit their exams. They have displayed excellent maturity so far around their exams.



So far, we have had Biology and Maths, with a few more to come.

Thank you again to Matt for making it run as smooth as it has!

Kingswood's exam period has started, and the students are doing well.

Our personal development

Outstanding Safeguarding At Kingswood

Our students have been attending mountain bike sessions at Ashton Court through out term 5. They have all had a brilliant time and have worked well with the instructors.
