

Our Curriculum.

Our curriculum has remained broad, engaging and responsive to student needs. A key highlight has been our climate change project, linking English, Humanities and reading. Students studied '*Floodland*', developing their understanding of environmental change alongside reading fluency and confidence through shared reading and discussion. In Food Technology, student voice has shaped learning - including making a Biscoff cheesecake from a student's recipe - boosting engagement and ownership.

This term, we've focused on inclusion, making sure every student can access learning that suits them. Pupils have taken part in a range of AQA Unit Awards, covering practical skills like cooking and sport, as well as important topics such as healthy relationships, bullying, knife crime and online safety. We're proud of how students have engaged with these opportunities and built confidence through their successes.

Our Inclusion.

Our Engagement.

We have seen strong engagement from many students this term, supported by a varied and active timetable. Weekly PE sessions at St Pauls Sports Centre have helped students re-engage with physical activity through sports such as basketball, football, athletics and rounders. Some students have also taken part in boxing enrichment at Empire Boxing, while others have developed responsibility and confidence through buddy reading with younger pupils.

Personal development has been a key strength this term. Students have taken part in a wide range of enrichment and awareness activities, including:

Celebration days such as International Women's Day, Red Nose Day, World Book Day and cultural events including Ramadan, Eid, Lent and Holi. Neurodiversity Week and the International Day for the Elimination of Racism. A visit from ASPENS for "Feed a Family for a Fiver". CPR and First Aid training with Great Western Air Ambulance Charity.

Our Personal Development.

Safeguarding

Safeguarding is always a key priority at Engage, with a strong focus this term on online safety. Students have explored topics such as online grooming, bullying and healthy relationships, learning how to recognise risk, manage peer pressure and make safe choices when using social media, gaming and messaging platforms. They have also developed an understanding of privacy, consent and how to report concerns or block harmful content.
